

Drivers for the VD16GZ image sensor and its derivative camera modules across diverse embedded processing platforms

Features

- Supported devices: VD16GZ and its derivative camera modules (CAM-16GZ)
- Compatible evaluation hardware:
 - VD16GZ S-Board (STEVAL-16GZMAI)
 - CAM-16GZ promodules and P-Board (STEVAL-CAM-M0I)

Description

Speed up your imaging projects with the ST **VD16GZ** image sensor drivers, designed for seamless integration and exceptional performance in embedded imaging applications. These turnkey drivers allow rapid deployment, enabling engineers to unlock the full potential of the sensor with minimal setup.

Our drivers are designed for broad compatibility with a variety of embedded processing solutions, including Raspberry Pi and more. This ensures effortless connectivity across diverse platforms. Download our drivers for free and access a complete suite of evaluation tools, detailed documentation, and video tutorials. Get started in just minutes! Our drivers not only support the VD16GZ image sensor and **CAM-16GZ** promodules, but also extend compatibility to camera modules from ST partners and distributors. This offers you the flexibility to choose hardware that best suits your specific needs.

Furthermore, our drivers are optimized for use with STMicroelectronics' turnkey evaluation hardware kits. They support the **VD16GZ S-Board**, featuring a MIPI sensor board with an M12 lens holder for flexible lens integration, and the **P-Board**, a MIPI promodule board designed for straightforward testing and deployment of CAM-16GZ evaluation camera modules.
