ST Partner
Low-Power RF module vendors

ITON

Products and Services offered:
Components and Modules

Company Head Office address:
1302, 4 Block A, Tianan Cyber Park, HuangGe North Rd., Longgang District, Shenzen, Gaundong, China
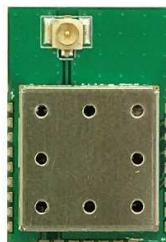

Company website:
en.sziton.com

Established in 2006, ITON Technology Corp. is a well-known innovative technology company that designs and manufactures wireless module products and provides solutions.

As an innovator and leader focused on RF modules such as Bluetooth and Wi-Fi modules, ITON has built its reputation. From its inception, ITON has consistently offered the wireless segment's leading technologies and ITON Connecting design services.

IIC

Products and Services offered:
Components and Modules

Company Head Office address:
Hongfeng Road No 35, Industrial Park, Suzhou , China
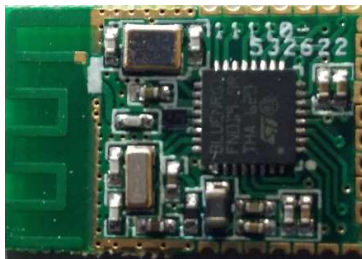

Company website:
http://www.iic-tek.cn

IIC has been founded in 2002 and is highly committed on embedded micro controller technology solutions, automation, industrial control, consumer electronics, communications and other fields providing enhanced wireless solution.
The company has professional R & D technical force, a wide range of sales network, set up branch offices in Shenzhen, in Hangzhou, Nanjing, Changsha, Chengdu and other representative offices.

BOOMTECH

Products and Services offered:

- *Components and Modules*
- Embedded Software
- Engineering Services

Company Head Office address:
2nd Floor, Building No. E, No.4, Yintian Road, Baoan District, ShenZhen, China

Company website:
en.boomtech.cn

SHENZHEN BOOMTECH INDUSTRIAL CO (BOOMTECH) is an IoT design house, module maker and providing total solution for wireless products based on Bluetooth and Wi-Fi technology.

BOOMTECH provides also software development.

JORJIN

Products and Services offered:

- *Components and Modules*

Company Head Office address:
17F, No.239, Sec. 1, Datong Rd., Xizhi Dist.xTaiwan (R.O.C.), New Taipei City 221, Taiwan

Company website:
www.jorjin.com

Jorjin Technologies is a provider of modular processing, sensing and wireless connectivity solutions, which enable our customers to bring innovative products to market fast with competitive cost. Jorjin wireless system in package (SiP) modules targeting wearable consumer electronics, automotive infotainment and cloud connected devices, and industrial mobile computing market.

Jorjin cover wide range of protocols including Wi-Fi, Bluetooth, ZigBee, WiSun, NFC, GPS, and GLONASS. In addition to supplying hardware, Jorjin offers driver porting services onto a wide range of application processors; Jorjin as well provide MCU-based connectivity solutions to support the emerging Internet of things (IoT) market. Jorjin hold advanced technology: producing extremely small footprints modules using either package on package (PoP) or multi-chip module (MCM) assembly technique.

Jorjin recently also set up a new imaging team to design and supply a range of camera sensor modules, 3D time of flight cameras and other sensor solutions to build up smart glasses for various industries applications.

ValenceTech

Products and Services offered:
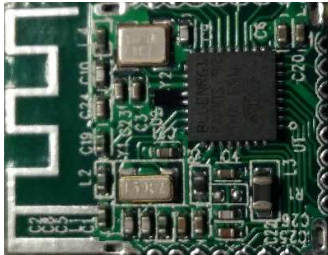

- *Components and Modules*

Company Head Office address:
Unit 5, 1/F, Blk B, Tonic Industrial Centre,19 Lam Hing St., Kowloon Bay, Kowloon, Hong Kong

Company website:
http://www.valencetech.com/

Valence is an award-winning fabless IC design company providing wireless connectivity solutions. We design, develop, and market standard and custom design analog, digital, and mixed-signal integrated circuits (IC) for the consumer electronics market. We have over 20 years of IC design experience, during which, we have successfully developed many high performance and feature-rich products for various applications. Our business focus on designing chips and modules for the vast consumer audio market, and also provides superior tailor-made service to our customers in the consumer electronics market.
